Re: Request for approval to remove Groundwater Monitoring Wells MW-6R and MW-7R  
Former Agricultural Park - Riverside, CA

Dear Mrs. Tasnif-Abbasi:

We request approval from DTSC and USEPA to remove Groundwater Monitoring Wells MW-6R and MW-7R that were installed by DTSC in September 2015. In accordance with the approved work plan for the Ag Park site, these monitoring wells were to be sampled for four consecutive quarters, starting in fourth quarter 2015.

That work has been completed by DTSC's subconsultant, and laboratory testing results have been submitted to both DTSC and USEPA. Based on the results, we request your authorization to remove/abandon these wells. FRA is in the process of obtaining well abandonment permits from the Riverside County Department of Environmental Health. Please find attached, the well abandonment permit applications for this work for your reference.

Please call either Ross Surrency or myself if you have any questions regarding this request.

If a response is not received before February 15, 2017, FRA plans to proceed with well abandonment activities.

Very Truly Yours;

Friends of Riverside Airport, LLC
